

### 3 x Wind Turbine Technicians

What are the responsibilities of this position?

- Service and maintenance of wind turbines on site
- Ensure Service tasks on wind turbines are performed according to company manuals and SHEQ standards, and in accordance with customer safety rules.
- Inspection of PPE and turbine-mounted safety equipment.
- Reporting of faults and defects on the wind turbine to the relevant stakeholders.
- Participate in on-call arrangements (flexibility is important).
- Participate in all relevant technical training from SGRE.
- The employee is obligated to keep him- or herself informed of the quality system and the procedures related to the position and to work in accordance with the requirements defined in the quality system.
- The employee is obligated to keep him- or herself informed of the environmental management system and the procedures related to the position. Including waste separation and handling of chemicals. The employee is obligated to respond to deviations observed from the procedures and to contribute to activities improving the environment.

Minimum required qualification for the position:

- N3 with Trade Test in electrical or mechanical engineering or relevant experience in the Wind Energy Industry.
- Candidate must be able to pass a physical examination and/or medical as this position will require mobility and some physical labour activities.
- The position requires someone with no more than 15 years working experience.

Location: Springbok, South Africa
